Advanced Oncology Education Series

**Clinical Trials Update:
Highlighting Select Programs in the NCI Center for Cancer Research**

**October 24, 2011
8:00 A.M. - 4:30 P.M.**

National Library of Medicine Lister Hill Auditorium National Institutes of Health

The field of oncology continues to move forward with new therapies, and a better understanding of the cancer experience. This course will provide nurses with a disease overview and protocol updates highlighting select programs from the NCI Center for Cancer Research: Neurofibromatosis, Thyroid Cancer, Molecular Imaging Trials, Multiple Myeloma, Gene Therapy Using Modified T-Cells, and Chronic Graft Versus Host Disease-Natural History and Treatment Trials.

Program is offered at no cost. CNE's are provided.
This activity has been submitted to the Oncology Nursing Society for approval to award contact hours. ONS is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's COA.

Target Audience: Nurses with 2 or more years of oncology experience.

The Lister Hill Center is located near the Medical Center metro stop at
8600 Rockville Pike; Bethesda, MD 20894
