

## HEALTHY VOLUNTEERS NEEDED

The National Institutes of Health (NIH) seeks healthy volunteers for a study about blood vessel stiffness. In this study, healthy volunteers will be compared with patients with rare genetic conditions that affect the blood vessels. All study-related procedures are provided at no cost and compensation is provided.

### About your participation:

- It may take several visits to the NIH Clinical Center to complete all components of the study (exact days and times to volunteer are flexible depending on your availability)
- Blood and urine collection
- CT scans, Holter monitor, echocardiogram, MRI/MRA (magnetic resonance angiography), and ultrasound imagings, among other tests

### Who can participate?

- Healthy volunteers 3-85 years old
- You must **NOT** have a history of a genetic heart condition

**Location:** The NIH Clinical Center, America's Research Hospital, is located on the Metro red line (Medical Center) in Bethesda, Maryland.
