

A Special Lecture

Sponsored by the Department of Bioethics, NIH Clinical Center

Medical Innovation in Humanitarian Situations: The Work of Doctors Without Borders

Dr. Jean-Hervé Bradol

*Director of Research at the Doctors Without Borders/Médecins Sans Frontières
Center for Reflection on Humanitarian Action & Knowledge
(Centre de Réflexion sur l'Action et les Savoirs Humanitaires—CRASH)*

April 16, 2010
11 am to 12 noon
Lipsett Amphitheater
Clinical Center, Building 10
National Institutes of Health

Please join Dr. Jean-Hervé Bradol for a discussion on his recently edited volume *Medical Innovation in Humanitarian Situations: The Work of Doctors Without Borders*. In the book, several authors examine the debates and controversies surrounding the obstacles to their medical work in precarious situations in the field—from developing logistical capabilities to improving the treatment of cholera, sleeping sickness, HIV/AIDS, malaria, and nutrition.

Doctors Without Borders/Médecins Sans Frontières (MSF) is an international medical humanitarian organization created by doctors and journalists in France in 1971. In 1999, MSF received the Nobel Peace Prize.

Reasonable Accommodations: Sign language interpreters will be provided. Individuals with disabilities who need reasonable accommodation to participate in this event should contact the Clinical Center Office of Communications, Patient Recruitment and Public Liaison at 301-496-2563. TTY users, please call through the Federal Relay Service at 1-800-877-8339.
